Phạm vi bao trùm các tạp chí thuộc mọi lĩnh vực nghiên cứu học thuật

- **Hơn 12,000 tạp chí thuộc 256 đề mục chủ đề về:**
 - Khoa học
 - Nghệ thuật & nhân văn
 - Khoa học xã hội
- **Hơn 12,000 kỷ yếu hàng năm.**

THOMSON REUTERS

DỮ LIỆU THAM KHẢO TỔNG HỢP

Nguồn tài liệu tham khảo sâu rộng cho phép nhà nghiên cứu:

- Hiểu & đánh giá đúng toàn bộ lịch sử nghiên cứu của 1 công trình
- Dự đoán những phát triển, tiến hóa về công nghệ
- Không bỏ lỡ những thông tin quan trọng
- Nắm được những đổi thay của thuật ngữ khoa học theo thời gian

Sự kết hợp giữa CSDL và công cụ hỗ trợ để nâng cao hiệu quả
và chu trình nghiên cứu:

- *Web of Science*
- *EndNote Web*
- *Journal Citation Reports*
- *ResearcherID*

Good quality research begins with good literatures

THOMSON REUTERS

WEB OF SCIENCE

- *Web of Science*SM cung cấp truy cập tới CSDL trích dẫn hàng đầu trên thế giới, bao gồm các tạp chí và kỉ yếu đa ngành có uy tín trên nhiều lĩnh vực như khoa học, khoa học xã hội, nghệ thuật, nhân văn, với thông tin hồi cổ từ 1900.
- Truy cập trên giao diện tìm kiếm tổng hợp *Web of Knowledge*.

Web of Science gồm 3 CSDL tóm tắt trích dẫn:

- Science Citation Index Expanded (SCIE):
8,300+ tạp chí Khoa học Kỹ thuật
- Social Sciences Citation Index (SSCI):
4,500 tạp chí Khoa học Xã hội
- Arts & Humanities Citation Index (AHCI):
2,300+ tạp chí Nghệ thuật & Nhân văn

WEB OF SCIENCE TRIAL

◆ Thời gian: từ 01/08/2013 đến 31/12/2013

◆ Thông tin truy cập:

✧ Địa chỉ: <http://webofknowledge.com>

✧ Phạm vi dữ liệu:

- ***Journal Citation Reports®: Science Edition 2008, Social Sciences Edition 2008***
- ***Web of Science (1975-nay): Science Citation Index Expanded, Social Sciences Citation Index®, Arts & Humanities Citation Index®***

Abstract: Win-win solutions that both conserve biodiversity and promote human well-being are difficult to realize. Trade-offs and the hard choices they entail are the norm. Since 2008, the Advancing Conservation in a Social Context (ACSC) research initiative has been investigating the complex trade-offs that exist between human well-being and biodiversity conservation goals, and between conservation and other economic, political and social agendas across multiple scales. Resolving trade-offs is difficult because social problems - of which conservation is one - can be perceived and understood in a variety of disparate ways, influenced (in part at least) by how people are raised and educated, their life experiences, and the options they have faced. Pre-existing assumptions about the "right" approach to conservation often obscure important differences in both power and understanding, and can limit the success of policy and programmatic interventions. The new conservation debate challenges conservationists to be explicit about losses, costs, and hard choices so they can be openly discussed and honestly negotiated. Not to do so can lead to unrealized expectations, and ultimately to unresolved conflict. This paper explores the background and limitations of win-win approaches to conservation and human well-being, discusses the prospect of approaching conservation challenges in terms of trade-offs and hard choices, and presents a set of guiding principles that can serve to orient strategic analysis and communication regarding trade-offs. Impact Factor Trend Graph: BIOLOGICAL CONSERVATION

Click on the "Return to Journal" button to view the full journal information.

**Impact Factor -- see below for calculations*

The journal impact factor is a measure of the frequency with which the "average article" in a journal has been cited in a particular year. The impact factor will help you evaluate a journal's relative importance, especially when you compare it to others in the same field. For more bibliometric data and information on this and other journal titles click on the "Return to Journal" button.

NOTE: Title changes and coverage changes may result in no impact factor for one or more years in the above graph.

2012 Impact Factor

Cites in 2012 to articles published in: 2011 = 990	Number of articles published in: 2011 = 346
2010 = 1518	2010 = 315
Sum: 2508	Sum: 661
Calculation: $\frac{\text{Cites to recent articles}}{\text{Number of recent articles}} = \frac{2508}{661} = 3.794$	

2011 Impact Factor

Cites in 2011 to articles published in: 2010 = 1047	Number of articles published in: 2010 = 315
2009 = 1603	2009 = 329
Sum: 2650	Sum: 644
Calculation: $\frac{\text{Cites to recent articles}}{\text{Number of recent articles}} = \frac{2650}{644} = 4.115$

THOMSON REUTERS

Citation Mapping Setup for Literature Record

Citation Mapping Help | Close Citation Map

Use this screen to create a citation map for the record named in the title bar above (the target record) — you can map forward, backward, or both forward and backward citations for the target record — you can also select the depth or number of generations of citation to map

Select Direction:

☒ Forward Only

☐ Backward Only

☐ Forward and Backward

Choose Forward to see records that cite the target record, choose Backward to see records the target record cites — to see both types, choose Forward and Backward

Select Depth: 1 Generation

Select the number of citation generations you want to see in the map you are creating — the records that directly cite or are directly cited by the target record are the first generation, records citing records that cite the target record and records cited by records cited by the target record are the second generation, etc.

Warning: Selecting 2 Generations may cause the map to time out due to the large numbers of records being retrieved. To improve performance when selecting 2 Generations select, Forward Only or Backward Only not both.
