Book: Vable "Mechanics of Materials, Second Edition", 2009, <http://www.me.mtu.edu/~mavable/MoM2nd.htm>

The syllabus is for 15 weeks, three credit course with two term exams and final.

The class problems are incorporated in the slides though the numbering system is different from the book.

There are many more problems in the book than the total in the two sets described below.

Static Review Exam is in the Appendix of the book.

Problems like SR1 refer to the Static review problems posted as slide on the web page.

Problems like C23 refers to the exercise in the box 'Consolidate your knowledge' on page 23.

Problems with * are computer problems.

Problems with + are 'Stretch yourself problems'
